Contents Volume 178 (2005)

Publisher's note
C. Fielding 1
Publisher's note
L. Mulder. 3

Research Papers
Steep microbial boundstone-dominated platform margins—examples and implications
J.A.M. Kenter, P.M.(Mitch) Harris and G. Della Porta 5
High-frequency cyclicity in the latest Messinian Adriatic foreland basin: Insight into palaeoclimate and palaeoenvironments of the Mediterranean *Lago-Mare* episode
D. Cosentino, P. Cipollari, S. Lo Mastro and C. Giampaolo 31
Automicrites in modern cyanobacterial stromatolitic deposits of Rangiroa, Tuamotu Archipelago, French Polynesia: Biochemical parameters underlaying their formation
P. Gautret and J. Trichet 55
Sedimentary environment and diagenesis of the Lower Cretaceous Chaswood Formation, southeastern Canada: The origin of kaolin-rich mudstones
G. Pe-Piper, L. Dolansky and D.J.W. Piper 75
Environmental and diagenetic records from a new reference section for the Boreal realm: The Campanian chalk of the Mons basin (Belgium)
J. Richard, J.-P. Sizun and L. Machhour 99
Metazoan–microbial framework fabrics in a Mississippian (Carboniferous) coral–sponge–microbial reef, Monto, Queensland, Australia
J.-W. Shen and G.E. Webb. 113

Discussions
Sea level changes versus hydrothermal diagenesis: Origin of Triassic carbonate platform cycles in the Dolomites, Italy—Discussion
N. Preto, L.A. Hinnov, L.A. Hardie and M.T. Harris 135
Sea level changes versus hydrothermal diagenesis: Origin of Triassic carbonate platform cycles in the Dolomites, Italy
W. Blendinger 141
Sea level changes versus hydrothermal diagenesis: Origin of Triassic carbonate platform cycles in the Dolomites, Italy: Discussion
A. Peterhänsel and S.O. Egenhoff 145
Sea level changes versus hydrothermal diagenesis: Origin of Triassic carbonate platform cycles in the Dolomites, Italy
W. Blendinger 151

Erratum
Erratum to "A genetic classification of carbonate platforms based on their basinal and tectonic settings in the Cenozoic" [Sedimentary Geology Volume 175 (2005) 49–72]
D. Bosence. 155

doi:10.1016/S0037-0738(05)00236-8

Research Papers
Expression and modelling of stratigraphic sequence distortion
C. Robin, D. Rouby, D. Granjeon, F. Guillocheau, P. Allemand and S. Raillard 159
Advance and application of the stratigraphic simulation model 2D-*SedFlux*: From tank experiment to geological scale simulation
Y. Kubo, J.P.M. Syvitski, E.W.H. Hutton and C. Paola 187
A model of early calcite cementation in alluvial fans: Evidence from the Burdigalian sandstones and limestones of the Vallès-Penedès half-graben (NE Spain)
D. Parcerisa, D. Gómez-Gras and A. Travé 197
Condensation and phosphatization of the Middle and Upper Ordovician limestones on the Malopolska Block (Poland): Response to paleoceanographic conditions
W. Trela. 219
Carbonate-cemented stylolites and fractures in the Upper Jurassic limestones of the Eastern Iberian Range, Spain: A record of palaeofluids composition and thermal history
R. Marfil, M.A. Caja, M. Tsige, I.S. Al-Aasm, T. Martín-Crespo and R. Salas 237
Sedimentary features of tsunami backwash deposits in a shallow marine Miocene setting, Mejillones Peninsula, northern Chile
G. Cantalamessa and C. Di Celma 259
Unexpected trend in the compositional maturity of second-cycle sand
W. Solano-Acosta and P.K. Dutta. 275
Grains in motion: A review
J.P. Le Roux 285
